PROFESSIONAL SUMMARY

Junior Data Analyst with strong hands-on experience in SQL, Power BI, Advanced Excel, and Python. Skilled in analyzing structured business data, building interactive dashboards, and delivering actionable insights for business. Actively seeking Junior Data Analyst / Business Analyst roles in analytics-driven organizations.

CORE SKILLS

SQL | Power BI | Advanced Excel | Python | Data Cleaning | Exploratory Data Analysis | KPI Analysis | Dashboarding | Business Reporting

TECHNICAL SKILLS

Programming & Analysis: SQL (MySQL), Python
Visualization Tools: Power BI, Tableau, Excel
Tools & Platforms: Jupyter Notebook, VS Code, GitHub

EXPERIENCE

Data Analyst – SkilloVilla (Project Experience) | Feb 2025 – Jul 2025

- Analyzed sales and operations datasets using SQL, Excel, and Python to support business reporting and performance analysis.
- Designed Power BI and Tableau dashboards to track 8+ KPIs across revenue, productivity, and operational efficiency.
- Automated data cleaning and transformation pipelines using Python, reducing manual processing time by 30%.
- Performed exploratory data analysis to identify trends, anomalies, and performance gaps for decision-making.

PROJECTS

Netflix Content Analysis | SQL | [LINK](#)

- Analyze 8,000+ Netflix titles using SQL to answer 15 real-world content and business questions.
- Performed analysis on Movies vs TV Shows distribution, ratings trends, country-wise content, and genre patterns.
- Used advanced SQL including WINDOW FUNCTIONS, CASE WHEN, subqueries, and string functions for ranking and categorization.

Pizza Sales Analysis | SQL (MySQL) | [LINK](#)

- Analyze 5,000+ pizza sales records using optimized SQL queries, joins, and window functions.
- Identified top 5 products contributing nearly 40% of total revenue and peak sales time windows.
- Generated business-ready insights to support menu optimization and demand planning.

Movie Genre Analysis Dashboard | Power BI, Excel | [LINK](#)

- Analyzed 1,000+ movie records across 15 genres to identify long-term consumption trends.
- Built an interactive Power BI dashboard with slicers and filters for genre-wise and year-wise performance analysis.
- Identified 12% growth in demand for action movies over a 10-year period to support content strategy planning.

Employee Performance Automation | Python, Pandas | [LINK](#)

- Cleaned and processed 10,000+ employee records using Pandas for HR reporting.
- Automated promotion, demotion, and bonus logic, reducing reporting time from 15 minutes to under 2 minutes.

Sales Performance Analysis | SQL, Power BI | [LINK](#)

- Analyzed 50,000+ retail sales records to evaluate revenue, profit, and margin trends across regions and products.
 - Identified top 20% products contributing 55% of total revenue and flagged loss-making sub-categories.
- Built an executive Power BI dashboard with 10+ KPIs to support pricing, inventory, and regional strategy decisions.

EDUCATION

Bachelor of Engineering in Computer Science – **Galgotias University**
Intermediate / Higher Secondary (Class XII) – **Sri Ramchandra Uchchra**

2021 – 2025
2019 – 2020

CERTIFICATIONS

Deloitte Data Analytics Job Simulation – Forage
Data Analytics with Python – SkilloVilla
AWS Academy – Data Analytics (AICTE)
Google AI & ML – AICTE
